

United States Senate  
WASHINGTON, DC 20510

May 5, 2022

The Honorable Dianne Feinstein  
Chair  
Senate Committee on Appropriations  
Subcommittee on Energy and Water  
Development  
Washington, DC 20510

The Honorable John Kennedy  
Ranking Member  
Senate Committee on Appropriations  
Subcommittee on Energy and Water  
Development  
Washington, DC 20510

Dear Chair Feinstein and Ranking Member Kennedy,

I certify that neither I nor my immediate family has a pecuniary interest in any of the congressionally directed spending items that I have requested in the Fiscal Year 2023 Energy and Water Development Appropriations bill, consistent with the requirements of paragraph 9 of Rule XLIV of the Standing Rules of the Senate.

Sincerely,

Christopher S. Murphy  
United States Senator

**Murphy, Christopher(D-CT) Energy and Water Development  
Congressionally Directed Spending Requests**

| <b>Recipient Name</b>                          | <b>Project Purpose</b>                                                                                                                                                                       | <b>Project Location</b>       | <b>Amount Requested (\$000)</b> |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------------------|
| U.S. Army Corps of Engineers                   | Funding to dredge approximately 50,000 cubic yards of silt buildup from the federal channel in the Stony Creek Harbor.                                                                       | Branford CT                   | \$5,000                         |
| U.S. Army Corps of Engineers                   | Funding for dredging of approximately 70,000-100,000 cubic yards from the Branford Harbor and River.                                                                                         | Branford CT                   | \$5,750                         |
| Greater Bridgeport Community Enterprises, Inc. | To fund the outreach, engagement and facilitation of a community-led, strategic clean energy plan for future energy conservation and renewable energy generation projects in Bridgeport, CT. | Bridgeport CT                 | \$200                           |
| U.S. Army Corps of Engineers                   | Funding for completion of the Army Corps' feasibility study for rehabilitation of the flood protection system.                                                                               | East Hartford and Hartford CT | \$1,500                         |
| U.S. Army Corps of Engineers                   | Federal funding for dredging approximately 23,000 cubic yards of silt from the Guilford Harbor.                                                                                              | Guilford CT                   | \$1,078                         |
| Town of Hamden                                 | Funding will help the town of Hamden purchase new energy efficiency equipment and make energy efficiency building improvements at the town's administrative office building.                 | Hamden CT                     | \$600                           |
| Town of Madison                                | Funding will help buy equipment and make necessary building modifications to improve energy reliability at the town's new emergency shelter                                                  | Madison CT                    | \$1,000                         |
| Town of Manchester                             | Funding will support energy efficiency upgrades at two public schools in Manchester, Connecticut                                                                                             | Manchester CT                 | \$1,900                         |
| U.S. Army Corps of Engineers                   | Funding for developing the plans and specifications for dredging of the New Haven Harbor, as well as to help solicit a contract to complete the maintenance dredging.                        | New Haven CT                  | \$14,075                        |
| City of Stamford                               | Funding will help the city of Stamford upgrade its network of inefficient, high-pressure sodium-based streetlights to energy-saving LEDs streetlights.                                       | Stamford CT                   | \$2,000                         |
| Children's Community Development Center, Inc.  | Funding will help install solar panels that will provide electricity to three childcare centers in Westport, Connecticut.                                                                    | Westport CT                   | \$165                           |
| Parent Child Center, Inc                       | Funding will help purchase generators for energy reliability at childcare centers in Westport, Connecticut.                                                                                  | Westport CT                   | \$55                            |
